SUMMARY

Software Engineer with 5 years of experience in developing APIs and backend systems. Passionate about writing succinct, self-documenting code while maximizing efficiency and limiting redundancy. A visionary excited to collaborate with a purpose-driven, interdisciplinary team.

TECHNICAL EXPERIENCE

Realtor.com

(July 2021 – Present)

Software Engineer II

- Developed and enhanced 7+ Enterprise Systems Backend APIs using NodeJS, integrating diverse databases and external service pipelines.
- Successfully migrated a legacy .NET service, developed over 15 years, to a Node.js 20 framework.
- Created comprehensive Splunk dashboards, reports, and alerts for high impact services.
- Resolved complex processing failures resulting in cost savings of over \$300,000 in third party billing.
- Involved in Auth0 and SSO Identity implementation for user sign up and login functionality.
- Authored extensive service architecture documentation, including presentations and one-pagers, to outline service features and company impact.
- Mentored New College Graduate Hire and Summer Interns.

Scorpion.co

(July 2019 – Sept 2019)

Web Development Intern

- Developed a Software Application Tool to convert Word HTML to Scorpion-Platform Formatted HTML, which boosted efficiency by 280%.
- Collaborated with a team to build a Chrome Extension to interact with and convert selected DOM elements on a page to properly formatted HTML.

Realtor.com

(July 2018 – Sept 2018)

Engineering Intern

- Worked with AWS Lambda, Transcribe, Comprehend, S3 for audio-to-text transcription.
- Wrote algorithms/scripts in Node.js and AWS Lambda functions for data analysis.

Realtor.com

(June 2017 – Aug 2017)

Application Development Intern

- Worked with AWS Resources including AWS S3, EC2, Firehose, API Gateway, CloudWatch, Lambda, VPC, Data Pipeline, SNS for proof of concept for a future project.
- Completed an AWS Essentials and Concepts course (udemy.com)

PROJECTS

TEECOM SCOUT Autonomous Drone

LiDar Navigation Programmer Lead

- Worked specifically with RPLidar A3M1 360° Laser Range Scanner and RPLidar SDK
- Successfully interpreted LiDar data points for correct doorway/window/hallway detection and to create a 2D mapping of rooms.
- Developed drone navigation code in Python dependent on expected drone flight stability
- Maintained reports and logs of data findings and project progression.

SKILLS

Programming Languages: Javascript, SQL, Python, C, Java, Bash, Zsh

Web Technologies: Node.js, RESTful APIs, JSON, HTML, CSS

Databases & Cloud: MySQL, PostgreSQL, MongoDB, MS SQL, AWS

Tools & Platforms: Visual Studio Code, Splunk 8.2.9, GitHub, Github Copilot, Swagger, Jenkins, Jira, DBeaver, NewRelic, Docker, Figma, Miro, Agile, Scrum, Remote Desktop, Slack, Windsurf AI, ArgoCD, CircleCI

EDUCATION

California Polytechnic University of San Luis Obispo

Bachelor of Science in Computer Engineering

(2016 - 2020)
